NEW! MATERNAL AND CHILD HEALTH MODULE

Leading through Health System Change:
A Public Health Opportunity
Planning Tool

HEALTH REFORM IS HERE.
ADAPT. PLAN. LEAD.
Learn more about what the Affordable Care Act offers for maternal and child health (MCH) through the free, online resource Leading through Health System Change: A Public Health Opportunity, [www.acaplanningtool.com](http://www.acaplanningtool.com).

The MCH module was developed in partnership with the National MCH Workforce Development Center. This guided practice was designed to assist state and territorial Title V agencies as they plan and implement health programs in an environment of health system transformation, but can be used by any organization or agency at no cost.

**Health Reform is Here. Adapt. Plan. Lead.**

The role of public health is changing and more than 1,400 users from all 50 states are using the ACA planning tool to think adaptively, have important conversations, and plan strategically with their teams.

Use the website or workbook with your own team to:

- Examine the basics of the Affordable Care Act;
- Apply adaptive thinking to questions related to health system change; and
- Create a simplified implementation plan to leverage the opportunities in the health care reform law to improve population health.

The maternal and child health module was developed in partnership with the National MCH Workforce Development Center. The planning tool was created and is supported by the Georgia Health Policy Center at Georgia State University, the National Network of Public Health Institutes, and the Centers for Disease Control and Prevention.
