

MONITORING AND MEASURING EQUITY-FOCUSED STRATEGIES

JSI Research and Training Institute

PROJECT SUMMARY

Building upon past research of how infrastructure and partnerships that build trust and reflect power sharing impact equity, JSI is investigating how equity manifests in the strategy development process undertaken by multisector health

collaboratives. Specifically, the rapid-cycle research seeks to answer

- How are collaboratives using data to inform the selection of equity-focused interventions and strategies?
- What outcomes and measurements are being used to monitor and document progress on equity-focused strategies?
