

# CROSS-SECTOR PERSPECTIVES OF VALUE CREATION: FINDINGS FROM A NATIONAL, MULTISITE ECOSYSTEMS LEARNING COLLABORATIVE

## *Camden Coalition of Healthcare Providers*

### PROJECT SUMMARY

The goal of this research project is to better understand how value is defined and measured by different organizations, as well as community members, in order to strengthen the implementation and sustainability of current and

future cross-sector collaborative initiatives. Additionally, the study will assess how community voice, perspective, and leadership can be better incorporated into the value equation of collaborative work. Insights will be gathered from participants in the Camden Coalition of Healthcare Providers' National Center for Complex Health and Social Needs' Ecosystems Learning Collaborative.
